Aarav Mehta

APPLIED AI ENGINEER

Pune, India | aarav.mehta@example.com | +91-00000-00001 | github.com/aarav-mehta-demo

PROFESSIONAL SUMMARY

Applied AI engineer with 2.5 years of experience building Python services and language-model prototypes for internal products. Has shipped document ingestion and extraction workflows, with hands-on Pydantic, REST APIs, SQL, and evaluation. Strong match for core work; production cloud ownership is still developing.

TECHNICAL SKILLS

Python, FastAPI, Pydantic, Groq API, OpenAI-compatible APIs, prompt design, JSON Schema, PyMuPDF, python-docx, PostgreSQL, pytest, Docker, Git

EXPERIENCE

Software Engineer, Cedarwave Systems | Pune | Jun 2024 - Present

- Built a Python service that extracts text from PDF and DOCX vendor forms, validates structured fields with Pydantic, and returns JSON through FastAPI.
- Integrated a hosted LLM API for entity extraction; added schema validation, retries, and a review queue for low-confidence outputs.
- Created a 180-document evaluation set and tracked field-level precision and recall; improved email and date extraction after error analysis.
- Worked with product and operations to redact sample documents and define handling rules for personal data.

Junior Python Developer, Cedarwave Systems | Pune | Jan 2023 - May 2024

- Maintained internal REST endpoints and PostgreSQL queries; wrote unit tests and fixed production defects with senior engineers.
- Automated document quality checks and reduced manual review time by about 25%.

EDUCATION

B.Tech, Computer Engineering | Savitribai Phule Pune University | 2022

PROJECT

Resume Field Extractor (personal project): parsed sample PDFs with PyMuPDF, prompted an LLM for structured output, and validated responses using Pydantic. Cloud deployment and monitoring are not yet implemented.
