Neha Kulkarni

DATA ANALYST

Mumbai, India | neha.kulkarni@example.com | +91-00000-00002 | linkedin.com/in/neha-kulkarni-demo

PROFESSIONAL SUMMARY

Data analyst with four years of experience using Python and SQL to turn customer and operations data into reporting products. Comfortable with text cleaning and API-based experiments, but has limited experience building or operating LLM applications.

TECHNICAL SKILLS

Python, pandas, SQL, PostgreSQL, Excel, Tableau, scikit-learn, text preprocessing, REST API basics, Jupyter, Git

EXPERIENCE

Data Analyst, Meridian Retail Group | Mumbai | Aug 2022 - Present

- Built Python and SQL reporting pipelines for customer support and sales data used by 6 business teams.
- Cleaned and categorized 70,000 customer comments using keyword rules and TF-IDF; shared weekly trend reports with operations leads.
- Created Tableau dashboards that reduced recurring manual reporting by roughly 8 hours each week.
- Prototyped an API-based summary of customer feedback in a notebook; it was not deployed as a production service.

Reporting Analyst, Meridian Retail Group | Mumbai | Jul 2021 - Jul 2022

- Maintained SQL extracts and Excel reports; documented data definitions and reconciled monthly business metrics.
- Partnered with engineering to report data-quality issues and confirm fixes.

EDUCATION

B.Sc., Statistics | University of Mumbai | 2021

PROJECT

Customer Comment Explorer: personal notebook project using pandas and scikit-learn to group short feedback by topic. No LLM, document parsing, or API service was included.
